MATHEWS, CASE & CO.,

(SUCCESSORS TO BROWN & MATHEWS)

Hardware and Agricultural Implements.

Having bought the entire interest of the late firm of Brown & Mathews, will continue the hardware and implement business at the old stand. We have bought the stock low and are closing out some lines of goods, and are in a position to make low prices. New purchases at recent low figures are arriving and on the way. By fair prices and square dealing we hope to retain our old customers and merit the good will of all who may trade with us. We call special attention to our

Iron Age Cultivators (with Horse Hoe Attachments),
Peoria Steel Plows, Remington Chilled Plows, Pennsylvania
Lawn Mowers, Ohio Buckeye Mowers and Victor Horse Rakes.

We carry the extras for these and other implements.

We offer a full line of Builders' Hardware, including the popular Chicago, (Niles Patent), Locks, Mechanics' Tools, Belting, Hose, Blocks and Pulleys, Barbed Wire' Wheelbarrows, and all kinds of Farmers' Tools.

All persons knowing themselves indebted to the old firm are requested to call at once and settle.

CONSUMPTION

And all the varied diseases of the Head, Throat and Chest, including the Eye, Ear and Heart, specially treated by

M. HILTON WILLIAMS, M. D.,

M. C. P. S. O.

Office—275 North Main street, next the Diamond House, Los Angeles, California.

All diseases of the respiratory organs treated by the most improved Medicated Inhalations, combined with proper constitutional remedies for the liver, stomach, blood, etc.

Nearly 60,000 cases successfully treated during the past 18 years for some form of head, throat or lung troubles.

In Catarrh—Inhalations dissolve the hardened concretions that form in the nasal passages, scatter inflammation, heal all ulcerated surfaces, and cure every case of catarrh affections, no matter how long standing or from what cause it may arise.

In Throat Diseases—Inhalations remove granulations, reduce large tonsils, subdue inflammation, heal ulcerated sore throat, restore the voice when lost or impaired, and arrest all acute cases, as diphtheria, quinsy, etc., with wonderful rapidity.

In Bronchitis—Inhalations perform wonders in restoring the mucous membrane to a health action; also immediately curing the cough and effecting entire cures in the most obstinate cases, whether in the acute or chronic form.

In Asthma—Inhalations immediately arrest the paroxysms and effect entire cures in every case by removing all unnatural obstructions, by and by restoring the mucous membranes of the air cells to their normal condition. The cures are usually permanent.

In Consumption—Inhalations loosen the phlegm, ease the cough, increase the circulation of the blood, assist assimilation, remove consolidation of the lungs, empty and heal cavities with wonderful promptness, arrest hemorrhages, stop all wasting away of the lungs; soothe pain, overcome all shortness of breath, and, in fact, cure all of the earlier and many of the later stages of consumption after all hopes by other means are past.

By the system of Medical Inhalations, Head, Throat and Lung afflictions have become as curable as any class of diseases that afflict humanity.

Our Eastern friends should not depend upon climatic influences alone, for herein lies the fatal mistake. Nearly every case requires positive medication, in order to become rid of the offending matter—the consolidated portion of the lungs—so as to give the climate an opportunity to heal them.

CONSULTATION FREE.

Those who desire to consult with me in regard to their cases or to location as to climate, had better call at my office for consultation and examination, but if impossible to do so, can write for a copy of my Medical Treatise, containing a list of questions. Address

M. Hilton Williams, M. D.

275 North Main street, Los Angeles, Cal.

Office hours—From 10 a. m. to 4. p. m. Sundays, from 3 to 4 p. m. Professional visits before and after office hours.

Cahuenga Valley Lands.

4 1-2 MILES FROM THE COURTHOUSE.

All persons seeking homes are invited to examine the delightful situation, soil and advantages of the magnificent land which we are offering

IN SMALL TRACTS

Of 5, 10, 15, 20 and 40 acres, at the very reasonable price of

$125 PER ACRE,

Equal in nearly all respects to the land for which, in many places, we are compelled to ask $200 to $250 per acre.

This property has the great advantage of being

FREE FROM FROSTS, STORMS OR FOGS,

And there is not an inch of waste land on the tract, which is LEVEL as a FLOOR. Schools are within ¼ mile, and the entire property lies on the GREAT THOROUGHFARE, between the city and the whole of the fertile Cahuenga Valley.

When watermelons grow here to 168 pounds and pumpkins to 195 pounds we need say no more.

Apples, peaches, pears, etc., grow to the utmost perfection.

Water is found in unlimited quantities near the surface, 12 to 30 feet.

Let us show you this splendid property before you buy elsewhere.

KUMYSS.

Milk Wine.

IS GETTING TO BE THE MAIN RELiance of the physician in all cases of debility in which prompt improvement of the general tone is imperative. Kumyss is the blandest and most easily digested food, and as such the best nourishment for a weak stomach; at the same time, through the process of fermentation which Kumyss undergoes, medicinal qualities are developed which we vainly look for in materia medica. In nausea, vomiting, extreme cases of dyspepsia, Kumyss acts like a charm, promptly relieving all the distressing symptoms of such cases. When the stomach rejects all else, Kumyss is retained and assimilated, affording the patient nourishment, strength and comfort, and, as a consequence, nervousness ceases and refreshing sleep follows. In scarlet, intermittant and typhoid fever Kumyss is the best diet. It satisfies thirst and hunger and allays the fever. It is also highly recommended in consumption as tonic and restorative. But not only in extreme cases should Kumyss be resorted to; it should be the chief remedy for a weak stomach.

The dyspeptic brain worker with a few glasses of Kumyss a day will improve his digestion, an d nerve force. Ladies would be less nervous, more vigorous and healthier looking, if they should add to their daily diet a few glasses of Kumyss.

Manufactured and for sale only by

C. LAUX, JR., Druggist,

208 North Main street.

There is nothing so refreshing and invigorating on a warm day as a glass of cold Kumyss, at Laux's Drug Store.

The Times.

Office—Temple, Main and New High.

PRESIDENT CLEVELAND has issued his first proclamation—a notice to the Oklahoma boomers to stand from under.

THE Police Commissioners of Sacramento have at last, to their credit, decided to make a determined effort to rid the city of gamblers. The police officers have been warned to refrain from "standing in" with the sports, under penalty of losing their places.

OUR Eastern exchanges bring us some interesting statements, which we do not recollect having seen in the press dispatches to any Coast paper—and which, if true, are likely to become historical—concerning the manner in which the final passage of the Grant Retirement bill was effected in the House of Representatives on the 4th of March.

It appears to be a fact—and it is a fact that ought not to be forgotten—that the Democrats did not consent to pass the bill until they were in effect bribed to do it. The history of this interesting legislative event is in substance as follows:

The contested case of Fredericks against Wilson, of Iowa, blocked the way. The Democrats were determined that it should be brought up; the Republicans were equally determined that it should not be. The case stood for two days as the dead-lock by which all other legislation was to be prevented except the appropriation bills. The leaders of both parties would have been content with the situation, but that, under these circumstances, it was impossible to also pass the Grant bill. The Democrats were obstinate. They would yield nothing. The Republicans did not wish to have Wilson sacrifice his seat. Finally what was practically the direct proposition came from the Democrats. They cared nothing for the Grant bill; they cared a great deal for the interests of the Congressional claimant, Fredericks. So the Republicans decided that if Mr. Wilson was willing to come to the rescue of General Grant and to permit the Democrats to declare Fredericks entitled to a seat and to receive a compensation of $10,000 for two years' service, none of which he performed, they would consent. Mr. Wilson, regretfully on account of his own pride and sense of justice, but gladly for the sake of General Grant, consented to the sacrifice. So it happened that the Grant bill passed the House. General Grant has been placed upon the retired list only because Mr. Wilson has made a great personal sacrifice. Even then the Democrats hoped to keep the bill back so long that it would be impossible for President Arthur to make the nomination, but in this they were unsuccessful.

It is our conviction that Mr. Wilson, of Iowa, did an act of noble self-abnegation, which fully and fairly entitles him to the high opinion and grateful admiration of his countrymen. This act will not be forgotten, and the facts deserve to go upon permanent record.

THE NEW ANÆSTHETIC.

A Discovery Apt to Supplant Chloroform and Ether.

For months the medical magazines have been filled with talk about the discovery of a new anæsthetic, to which was given at first the rather clumsy name of the "hydrochlorate of cocaine," but is now more properly called "cocaine chloride." It is what the chemists call an "akaloid," and is extracted in small quantities from the erythroxylon coca, thus coming honestly by a long name. The ubiquitous funny man takes advantage of its high price to change the old compliment of "worth one's weight in gold" to worth one's weight in cocaine. A wealthy comparison, indeed, as this new miracle-worker is sold at $12 per ounce, in a moderately weak solution. This is partly because the demand at present exceeds the supply, and partly because so small an amount of the active principle of the coca can be extracted. Like all new things, especially of a pain-destroying character, it is having an immense "run," and every day brings word of some new use to which some daring and original physician has put it. If it will really do what is claimed for it by reliable and famous physicians in all parts of the land, then present and future sufferers will indeed rise up to call it and its discoverer—Dr. Kohler—blessed.

Those of us whose lives have begun since the beneficent discovery of chloroform or its still more benign relative, ether, shudder to think of the horrors and helpless agonies of those to whom it was unknown. Yet, even now, many are unwilling to take advantage of its temporary sleep, except in desperate cases, dreading naturally the feeling of slight suffocation attendant upon its inhalation, and more yet, possibly, the feeling of lost identity, as if one were sinking down or floating off into a dim vast, unknown somewhere, as if never to return. Following this, too, comes the nausea and general disturbance of appetite and digestion, which is the usual sequence of the inhalation of ether. The new preparation is to obviate all this. One is to be able to retain one's full senses, the brain interested and active, and yet at the seat of pain caused by disease or the surgeon's knife, the nerves—those little telegraphic wires of sensation—are to lie irresponsive and passive. In fact the cocaine simply breaks their connection with the central office—the brain. A writer in the well known Medical Record says: "It (cocaine) bids fair to step into the front rank of therapeutical agents, elbowing opium, quinine, and the other indispensibles." At first the use was chiefly in operations upon the eye, it being found that in almost every case a few applications of its solution would enable the otherwise exquisitely sensitive eye to be cut this way and that, while the patient sits at ease, watching the quick flash of the silver lancets, or admiring the different contrivances for making crooked eyes "see life clear and see it whole" once more. When this is one of the every-day affairs, which we no longer consider new or startling, we may hope to see no more unfortunates among the poor, as now, whose eyes look so squintingly on this world as to make it no wonder that they have a mental and moral squint also. Another use of cocaine, already well tried, is in dental practice, where it is used to dull the pain of sensitive teeth in filling and extraction, and also helps to arrest the bleeding. It is used to enable physicians to examine sensitive throats, where even a tongue depressor is irritating, and the throat mirror unbearable, "in the horrible *tic doloreaux* and other neuralgic ailments, it is applied over the affected nerve, relieving the pain, at least temporarily. In the pains and woes of teething babies it is rubbed on the gums. In consumption its inhalation may give quiet sleep, and is expected to have great value as a sensation-killer in child-birth, or any surgical operation, such as lancing or probing, etc. Thus it is seen how wide and helpful is the range of the new alkaloid. So far it seems unattended with any danger, for while some of the patients under its influence have become pale and faint, and even covered with a cold perspiration, all this can readily be accounted for by remembering that mere absence of pain does not give mental self-control, and the mere idea that one was being subjected to an operation is sufficient to produce all these symptoms. "It is yet too early to assign cocaine its exact place in medicine, but ere lone the balance between overenthusiasm and over-skepticism will be struck, and the actual gain to the world at large accurately known.

D. L., M. D.

Victor Hugo: Nothing is so stupid as to vanquish; the real glory is to convince.

POLITICAL PRIZES.

General Discord Among Democratic Office-seekers.

VOORHEES AND HENDRICKS UNHAPPY.

The "Sun" Advises Cleveland to Throw the Mugwumps Over—Civil Service Reform to be Enforced.

Associated Press Dispatches to The Times.

NEW YORK, March 13.—The Sun this morning bristles with points against Cleveland's civil service policy. It advises Cleveland to stand by the Democracy and let the mugwumps go.

The Herald's Washington special says: Cleveland yesterday emphatically declared that he will carry out the civil service reform. Both Hendricks and Voorhees dissented most emphatically from the positions of the President, and especially from the purpose he announced of making changes very slowly, and, except in those classes of offices which every one expects to change almost at once with the administration, making them only for cause. The President's views, if carried out, will not, speaking generally, give offices much faster than commissions expire.

WASHINGTON, March 13.—The first decided action of Secretary Manning, in regard to changes in the force under the Treasury Department, was announced this morning. It consists of a reduction of the force in the special agents' division, whereby it is expected a saving of $40,000 annually will be effected. Some forty persons in various parts of the country have been dispensed with and notices to that effect mailed them to-day. The list includes six special agents, twenty-six special inspectors of customs and ten employes whose names are borne on the so-called "fraud roll."

The President received the members of the Diplomatic Corps and the ladies of their families in the blue parlor of the Executive Mansion this afternoon. He was assisted by his sisters, Miss Cleveland, and Mrs. Hoyt. The members of the Cabinet and the ladies of their families were also in attendance. The visitors were formally presented to the President and the ladies of his family by the Secretary of State. The reception lasted about an hour, and all the foreign representatives called to pay their respects.

THE "BOOMERS."

A Proclamation by Cleveland, Forbidding Invasion.

WASHINGTON, March 13.—In answer to a telegram from the Secretary of War, relative to the exact condition of affairs in Oklahoma, General Hatch to-day telegraphed from Caldwell, Kas., that no trespassers were now in the Indian Territory. About twelve hundred settlers, he said, were camped in Kansas, near the Territory border. They were threatening to go over the line, but as yet had taken no steps of that kind. Troops are stationed in the Territory, the General said, and will drive out any invader that may attempt to settle on the lands. At the meeting of the Cabinet yesterday the Oklahoma question was considered at great length. It was said an impression prevailed among those who contemplated an invasion of the Territory that President Arthur's proclamation relative to trespassing upon Indian lands had become inoperative with the close of his administration. To prevent the action by the invaders, that would naturally ensue, it was thought best that President Cleveland should issue a proclamation similar to that issued while Arthur was Chief Executive.

The following proclamation has been issued

By the President of the United States of America:

A PROCLAMATION.

WHEREAS, It is alleged that certain individuals, associations of persons and corporations are in unauthorized possession of portions of the territory known as the Oklahoma lands, within the Indian Territory, which are designated, described and recognized by treaties and laws of the United States and by the executive authority thereof as Indian lands, and

WHEREAS, It is further alleged that certain other persons or associations within the territory and jurisdiction of the United States have begun and set on foot preparations for an organized and forcible entry and settlement upon the aforesaid land and are now threatening such entry and occupation, and,

WHEREAS, The laws of the United States provide for the removal of all persons residing or being found upon such Indian lands and territory without permission expressly and legally obtained from the Interior Department,

Now, therefore, for the purpose of protecting the public interests, as well as the interests of the Indian nations and tribes, and to the end that no person or persons may be induced to enter upon said territory, where they will not be allowed to remain without the permission and authority aforesaid, I, Grover Cleveland, President of the United States, do hereby warn and admonish all and every person or persons now in occupation of such lands, and all such person or persons intending, preparing or threatening to enter and settle upon the same, that they will neither be permitted to enter upon said territory, nor if already there, to remain therein, and that if a due regard for and voluntary obedience to the laws and treaties of the United States, and this admonition and warning be not sufficient to effect the purposes and intentions of the Government as herein declared, the military power of the United States will be invoked to abate and remove unauthorized possession, to prevent such threatened entry and occupation, and to remove all such intruders from said Indian lands.

In testimony whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

GROVER CLEVELAND.

By the President.

T. F. BAYARD, Secretary of State.

Cleveland's Nominations.

WASHINGTON, March 13.—The following nominations have been made: Colonel Nelson S. Davis, Inspector General, to be Inspector General with the rank of Brigadier General; Colonel Absolam Baird, Inspector General, to be Inspector General with the rank of Colonel; Major Robert P. Hughes, to be Inspector General with the rank of Lieutenant-Colonel.

The Senate has confirmed Charles S. Fairchild, of New York, as Assistant Secretary of the Treasury.

The Treaties Returned.

WASHINGTON, March 13.—The President's message asking for the return of the Nicaragua, Spanish and Dominican treaties was received by the Senate to-day in executive session. The treaties will be returned to the Executive at once, no action by the Senate being required. The message withdrawing the treaties was very short. It assigns no other reason for the withdrawal but for re-examination.

The Hazen Court-Martial.

WASHINGTON, March 13.—In the Hazen court-martial the attorney for the defense created a sensation by declaring that certain newspaper articles derogatory to Gen. Hazen would be traced to Secretary Lincoln's desk and to his hand. With some unimportant testimony from Captain Mills, of the Signal Office, the prosecution rested the case. The defence had not concluded the examination of Hudson when the Court adjourned.

THE STATE CAPITAL.

Convicts' Sentences Commuted by the Governor.

SACRAMENTO, March 13.—The Governor has commuted the sentence of Thomas Cove, sentenced in August, 1880, in San Francisco to 113 years, to ten years. This was done on the recommendation of the Board of Prison Directors on account of his previous good character and doubts as to his guilt. The sentence of Henry Pearce, convicted in Mariposa county in October, 1875, of murder in the second degree and sentenced to twenty years imprisonment was commuted to fifteen years. This is virtually a pardon as under its provisions Pearce's term will expire to-morrow.

SUPPRESSING GAMBLING.

The Police Commissioners of this city, composed of the Mayor, Police Judge and Chief of Police, held a meeting this afternoon and it was decided to make a most vigorous effort to enforce the law prohibiting gambling, and policemen were warned they would lose their place unless they do their duty in the premises.

An Expert in Divorce Matters.

PHILADELPHIA, March 13.—John J. Miller in 1849 married Elizabeth S. Rogers. The result of the union was four children. They were divorced and Mrs. Miller married Robt. E. Randall, a brother of Samuel J. Randall. The lady soon procured a second divorce and remarried her first husband, who in the meantime had become a well-known sporting man. Mrs. Miller a third time secured a divorce, and now it is alleged it was done by collusion. Mrs. Viola Bonavitas, the wife of Frank J. Bonavitas and daughter of Mr. and Mrs. John J. Miller, hearing of the collusion entered into by her father and mother in derogation of her own right, brings an action in the courts to have the divorce set aside.

LABOR TROUBLES.

Probable Solution to the Railroad Strike to be Reached To-day.

GALVESTON, March 13.—The News' Palestine, Texas, special says: The strike at this place ended this afternoon. Superintendent Herrin sent for the Executive Committee of the Workingman's Union, who immediately waited upon him. The result of the conference was an order to resume work to-morrow morning on the terms in force before the last cut. An agreement to this effect has been signed by Superintendent Herrin, Master Mechanic Morris and the strikers' committee. Also if extra time is put in they are to receive extra pay. This agreement only extends to the International Great Northern branch of the Gould system. The workingmen are greatly elated over the victory, being congratulated on all sides for accomplishing their end without violence.

HOXIE'S REMOVAL ASKED FOR.

GALVESTON, March 13.—The News' Dennison special says: A mass meeting last night of strikers adopted a resolution calling for the removal of Vice-President Hoxie, and that a man be placed in his stead who has a little feeling for suffering humanity. It was declared the sense of the meeting that the company should furnish competent physicians in charge of the hospitals and make a quarterly report of the expenditures to a committee of employes.

It is reported to-night that Sheriff Douglas is raising a posse of men to come from Sherman to-morrow to restore order and help move freights. A conflict is feared, as Douglas is a brave officer. The strikers have concluded to meet the Sheriff with a brass band, escort him to the yards and there present him the keys of the shops.

PROCLAMATION FROM MARMADUKE.

ST. LOUIS, March 14.—Governor Marmaduke issued a proclamation late last night, warning the strikers and all persons associated with them that interfering with the movement of engines and trains and the intimidation of other persons who may be willing, or desire to work, is unlawful, and calling upon county and municipal officers to promptly enforce the laws, and commanding all individuals or combinations of individuals in any way engaged or concerned in interfering with the free traffic of railroads or in the intimidation of their employees to desist at once and without further warning.

CONFERENCE OF RAILROAD MEN.

ST. LOUIS, March 13.—At a private conference of Vice-Presideuts Hayes and Hoxie and General Solicitor Brown, of the Gould lines, about the strike matters, held here to-day, a telegram was received from Gov. Martin of Kansas saying he would be here Sunday with the Railroad Commissioners of Kansas to discuss the situation. Gov. Marmaduke of Missouri will also attend. It is expected the meeting will determine the future action of the two States and the railroads towards the strikers, and *status quo* will be maintained till then by the roads.

MARSHALL, Texas, March 13.—The strike is unchanged. A general opinion prevails that a settlement will be reached within twenty-four hours.

Engineers' Strike.

MACONGA, March 13.—All the engineers on the Brunswick division of the East Tennessee, Virginia and Georgia Railroad struck to-night. The strikers are members of the Brotherhood of Locomotive Engineers, and they say the cause of the strike is the unjust discharge of three of their members.

Strike in San Francisco.

SAN FRANCISCO, March 13.—A strike occurred at the Potrero Rolling Mills in this city to-day. Fifteen helpers refused to continue work on the announcement that their wages would be reduced from $1.15 to $1 a day.

Fire Record.

WRIGHTS, Cal., March 13.—The Hotel de Redwood, a summer resort, situated three miles from this place, was burned to the ground at 12 o'clock last night. The fire originated from an incubating room. Everything was lost except a piano. There was no insurance. The loss is about $2500. The property is owned by M. S. Cox.

SAN FRANCISCO, March 13.—The Portland Oregonian's Ellensburg special says: A fire occurred here this morning, which started in the Valley Hotel and destroyed property to the amount of $23,000. The principal losers are Walter A. Bull, Valley Hotel and furniture, $12,000; Martin Sutter, New England Hotel, $4000, partially insured; John Lyon, saloon, $2500, insured for $1700; Walter Keyes, saloon and building, $2000, partially insured.

Death of Prominent People.

LONDON, March 13.—Joseph John Jenkins, a well known painter in water-colors, is dead. He was born in London in 1811.

The death of Sir Curtis Miranda Sampson, Bart., is announced. He was born in Vermont, September, 1806.

OMAHA, Neb., March 13.—Joseph H. Taylor, Assistan Adjutant General of the Department of the Platte, died of pneumonia at his residence to-night. He was a nephew of Zachary Taylor and son of Joseph P. Taylor, Commissary General of the army. His paternal grandfather was Richard Taylor of Revolutionary fame. Deceased was a West Point graduate of the class of '56, and served on the staff of General Sumner in the army of the Potomac throughout the rebellion, and gained celebrity by effective work in bringing Lincoln's assassin to the gallows.

Threatened Indian Outbreak.

SAN FRANCISCO, March 13.—The Examiner's Albuquerque, N. M., special says: A letter just received from Fort Apache brings the news of an expected Indian outbreak there, and that the troops are kept in instant readiness for action. The trouble originated as follows: A Chiricahua was in prison under Indian guards for the murder of a white man two years ago. He attempted an escape last Friday. One of the guards, a White Mountain Apache, called upon him to stop, and on refusal brought his gun to bear on the escaping man, when another guard—a Chiricahua and a cousin of the murderer—placed his rifle against the abdomen of the other guard and literally cut him in two. The White Mountain braves are gathering for vengeance and serious trouble is anticipated.

Facilities for Observing the Eclipse.

SAN FRANCISCO, March 13.—Respecting the annular eclipse of the sun which will take place on Monday next, the 16th, Rear-Admiral, United States Navy, and Superintendent of the United States Naval Observatory at Washington, has issued notice that through the courtesy of the Western Union Telegraph Company, the noon signals from the observatory will be sent on the 15th and 16th of March over the telegraph wires as far west as Helena,

ENLARGED SHEET.

SATURDAY, MARCH 14, 1885.

The Egyptian Pyramids.

The Egyptian editor of a cotemporary, remarking upon that elevated subject, the Pyramids, which have been objects of study for ages, says that being far removed from any rock supply or quarry, "it has been the marvel how such big stones as those used in their construction could have been transported and placed in position, or even quarried so perfectly, as large as they are." It then goes on to say: "The perplexity of mind over the mechanical problem is, according to the latest scientific investigation, easily removed, and the ancient Egyptians who erected mausoleums neither had to work, hundreds of thousands of them for years at a time, as has been supposed, but soon got them up easily. It is said the Pyramids are built of artificial stone made from the material of the surrounding plains, and moulded and put up layer after layer. The Pyramids at first were just huge piles of mud, like a newly-built *adobe* house, and have hardened to their present state. The Sphinx, too, we suppose, instead of being sculptured out of rock as hard as porphyry, was originally a huge mud figure set up to dry, and dry it has."

This very pretty theory is not subscribed to by Stuart Stanley, the student, traveler and engineer, who has stood upon the Pyramids, examined their composition and manner of construction, and may therefore be fairly considered qualified to speak intelligently in regard to them. Capt. Stanley explodes the idea that these huge structures are far removed from any rock supply, or quarry, and asserts that the opposite is the truth; that the quarries whence the stones were doubtless procured are not distant, and that the great slabs are of rock—real rock, not *adobe*. He says the foundation of the Pyramids is a huge limestone rock, evidently found in place, and subsequently moulded to make a suitable base for the structure; that there is reason to believe that the motive power used to elevate the immense slabs was some sort of hydraulic power furnished by the river Nile, and that the use of the inclined plane was probably known at that day, the sand of the surrounding plain being perhaps heaped up against the shaft as fast as it was built heavenward, thus constituting a simple and practicable base of operations.

The Sphinx, too, is nothing more nor less than an enormous rock, cut into its present form, without ever having changed its position. That rock is over 125 feet long, by 65 feet high, and some 67 feet wide, and so hard is the material of which it is composed that even to-day tools of the keenest edge are "turned" in attempting to cut it. The color of the stone is a pale green.

The theory that the pyramids are anything but solid rock—the hardest kind of rock—is not plausible. *Adobe* would long since have crumbled to dust under the ceaseless attrition of the ages.

A Prophet.

General R. E. Colston, late of the general staff of the Egyptian army, who contributes the article on the Soudan—"The Land of the False Prophet"—to the current number of The Century Magazine, had an "open letter" in the September Century, 1884, in which he predicted that the fall of Khartoum was only a question of time, and that the only hope for Gordon's safety lay in his being captured and held for ransom. In a recent private letter to the editors of The Century, General Colston says: "What would Wolseley not give now to have his forces once more concentrated at Korti! That will never be; and I fear much that Wolseley will never get back. The Bedouin tribes four hundred miles north of him can interrupt all his communications even below Korosko, and virtually besiege him; and it matters little whether he is confined to a space of a hundred square miles or one square mile in a country which affords nothing for the subsistence of an army. Butler, besieged at Abu Klea, eating his camels, short of water, transportation and ammunition, is doomed. At least, these are the probabilities; and in war, as in chess, we must assume that our adversary is going to make the best, not the worst, move possible. The British are paying very dearly for underrating the enemy's skill as well as pluck. Graham, it is said, will have 8000 men at Suakim by the 9th of March. He will never march ten miles beyond, in my opinion."

THE New York Evening Post reminds persons who think that Mr. Cleveland is violating precedent in taking two Cabinet members from one State that they are forgetful. Lincoln had Hugh McCulloch for his Secretary of the Treasury and John P. Usher for Secretary of the Interior, both from Indiana; Johnson reappointed the same men, kept William H. Seward, of New York, for his Secretary of State, and afterwards called Mr. Evarts to be Attorney General. Grant selected his Secretary of the Treasury and Attorney General from Massachusetts in George S. Boutwell and E. Rockwood Hoar, while Hamilton Fish and Edwards Pierrepont, of New York, were in the Cabinet together.

IN the new (XLIXth) Congress, the House of Representatives is controlled by the Democrats, and the Senate by the Republicans. The House stands: Republicans, 140; Democrats, 182; Greenback-Labor, 1; Fusionist, 1; vacancy, 1; total, 325; majority, 163. The political complexion of the Senate is as follows (Mahone and Riddleberger being classed as Republicans): Republicans, 41; Democrats, 34; doubtful, 1. These are the figures given by the New York Tribune Almanac.

There are three Williams in the Cabinet—Whitney, Endicott and Vilas. The question is, whether these "trills" are to be honored by the country.

SOUTHERN MEXICO.

A Los Angeles County Man's Experience in the State of Chiapas.

[The following has been furnished for publication in the MIRROR for the information of "whom it may concern:"]

ON THE OCEAN, Feb. 28th, 1885.—Having left Downey City, Cal., for Southern Mexico on December 10th, 1884, I will now endeavor to tell what I saw and think of that country.

I left San Francisco on December 16th and landed at San Benito December 30th, 1884. I here met the agent of the American Colonization Company of Southern Mexico, Mr. E. Mattern, and also Mr. Will C. Ramsey. We left this port the next day, on a lumber wagon drawn by five mules—two behind and three abreast in front—and went to Tapachula, twenty-four miles, a town of from 5000 to 8000 population, where the company have their office. We remained there six days waiting for our freight to be brought from the Port San Benito, and passed through the custom house. We then went to Nejapa, where the colonists have settled on the five acre lots that the company have cleared up and give each settler if they wish, by paying them $50 for clearing the same. There are some 30 of these lots cleared, and most of them have temporary houses on them. We found three families and several bachelors on these lots. Three of these lots have wooden buildings on them; one owned and occupied by Mr. Skelenger, wife and four children, one by Mr. Mathena, wife and two children, and one by Mr. Catlan and two children. The temporary houses are mostly built by setting up four forks, upon which is a roof made of palm leaves. These lots are mostly planted in corn and on most of them are found the sweet potato, pineapple, banana, plantain, black-eyed peas, rice, etc. This settlement is about 1500 feet above the sea, and has a temperature of from 65 to 75°. It is quite broken here, and the soil is a red clay. At Tapachula, twenty-four miles from the coast and 500 feet above the sea, the mercury stands, morning 70° and night 80°. At an elevation of 5336 feet, the mercury stood 61° morning and and 71° evening, varying but ten degrees in twenty-four hours, and is said to vary but a few degrees from these figures at any part of the year. I found this country, in some respects, better than I expected. I have never seen a country that will equal this in richness of soil, productions, water, climate and health. The soil is good from the ocean to the top of the mountains, and is covered with a dense jungle of vines, small and large trees, except a small part of the low lands, which is prairie—spots of from three acres to 400 acres in size. The whole country is well watered with small living streams near the top of the mountains, uniting as they descend to the low lands into larger brooks and several rivers of considerable size, all of good soft water. It would be hard to locate 250 acres of land in a square farm on the company's lands without a living stream upon it. I saw growing upon the company's land coffee, chocolate and rubber trees, cotton, rice, tobacco, sugar cane, coca nuts, oranges, banana, plantain and many other kinds of native fruit, etc. Now as to *health*, I never have found a country with as many old people, both men and women, in proportion to the population, and as few cripples as here. The *climate* is simply excellent, varying, as before stated, only about 10 degrees during 24 hours, and but a few degrees, from this report, at any season, of the year at the same elevation. No plowing is done here as yet. All crops and trees are planted and cultivated with large knives.

Now for the other side: The whole country, except in Tapachula, as far as I saw—and I saw most of the company's land—is infested with mosquitoes, gnats and ticks in great abundance. Each of these insects set up an irritation wherever they bite you, and caused me to set up an almost continuous scratching day and night, when awake, something after the order of the seven-year itch. Added to these are ants, fleas and bed-bugs, and also weevil, so abundant, that it is difficult to keep rice, corn, beans, peas, etc., any length of time; and last the grasshopper, on the low lands, which you know is always hungry, and does not respect a man's crop more than other green vegetation. I saw many droves of these traveling in an easterly direction, not yet quite ready to fly, covering a belt of from one hundred yards to some half or three-quarter of a mile in width, the largest drove covering this jungle of green vegetation, small trees, etc., until it bent under their weight, and were given a brownish color by them; and in the path, as my horse walked through them, they tumbled in heaps on either side of the path, several deep, so that I could have taken a scoop shovel and have filled a two-horse wagon-bed with them in a short time.

They were literally cleaning all green vegetation of its leaves, including the coffee, tea, cotton, orange, etc., except the sugar cane. Taking all things into consideration, I have concluded to bring my boy back to California for the present, notwithstanding sugar cane is said to yield as much as 25,000 pounds of crude sugar to the acre, and crops such as coffee, chocolate, rubber, tobacco, cotton, sugar cane, etc., bid fair, from samples which I saw growing, to pay well. The company's land covers the elevated part of what is known as the Soconosco District, State of Chiapas, Mexico, and is quite broken. There are about 20,000 natives in this district who live almost without clothing or houses, and eat but little except corn and native fruits. Stock, both horses, mules and cattle, are small and of poor quality, and generally lean in flesh. I found the agent, Mr. Edward Mattern, at Tapachula, and Mr. Charles Dise, at Hejapa, very kind and obliging and willing to help and show us the company's land. Also found the colonists kind and obliging to me. Very respectfully,

G. W. WOLFE.

LETTERS FROM THE PEOPLE.

[This is the TIMES-MIRROR'S Public Forum. Those who would stand thereon must first give the editor their real names and be responsible for their opinions and statements.]

Parliamentary Propositions.

To the Editor of the Times—SIR: There seems to be a good deal of trouble in our City Council. Will you oblige me and publish through the columns of your paper these parliamentary rules, for the information of some of our Councilmen, as I understood them when the charter was made:

"Resolutions are an expression in writing of an opinion, or a determination to do or not to do; but a resolution is not an act, which cannot create a right or an obligation or liability.

"An ordinance is an act in writing creating a law, a right, a liability or an obligation.

"Motions are parole propositions, but no law, right or liberty can be created or appropriations can be made through that medium. If an act is first authorized by an ordinance, the Council can by a motion direct the execution of its details and the payment of money as authorized by the ordinance."

EX-COUNCILMAN.

[The force of this observation lies in the application of it, as we take it. We suppose that what our correspondent is driving at is that the Council can't either fill an office, or vacate one, by a motion.—ED.]

THE SUN'S ECLIPSE.

Something About the Solar Show to Come Off March 16th.

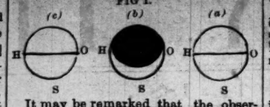
Mr. N. D. Robinson, of Artesia, furnishes the following to the MIRROR:

As I have computed for my own observation the various phases of the solar eclipse that will occur on the 16th inst., I send you a brief outline of the result, thinking it might be of interest to some of the many readers to your very valuable paper.

An annular eclipse of the sun, March 16, 1885, visible at Los Angeles and vicinity as a partial eclipse. The phases will be given in "mean time," and Q will represent the angle of the point of contact measured from the north point of the sun's limb toward the east. Then we have: Eclipse begins March 16th, 7h. 51m, 4s. a. m., Q 255° 59'; greatest obscuration March 16th, 9h. 9m. 7s. a. m.; end of eclipse March 16th, 10h. 37m. 1s. a. m., Q 55° 52'; magnitude of eclipse 0.842 (the sun's diameter 1.), or about 10.1 digits.

Now leaving out all technicality, I will give below, a rational view of the phenomenon as it will appear to those who witness it from this locality. In the figure below let S represent the sun's disc; and let H O be a right line passing through his center and parallel to the horizon directly under it. Then will the first contact be represented at (*a*), greatest obscuration at (*b*) and end of eclipse at (*c*). To make this diagram appear natural, the observer should stand facing the sun as he does this paper when reading it.

FIG 1.



It may be remarked that the observation of a total eclipse, or one nearly so, is instructive for many reasons. To the ordinary observer it is interesting to notice the peculiar hue that objects around us assume when ten or more digits of the sun are obscured. When the eclipse advances to nearly the greatest obscuration, for this locality, the color of the sky changes somewhat from an azure blue to a dusky, livid, ashy hue. The human countenance has a wan or pale (a Boston man would say cadaverous) appearance. At this point the fowls generally gather toward headquarters for the night, and even persons become a little uneasy and have a desire to communicate their impressions to those around them.

As the moon advances upon the sun's disc, shutting out his light from us, we may, with a little imagination, realize how the landscape appears on those planets situated far out beyond ours. In the eclipse of the 16th inst. let us all get a landscape view of one on the planet Neptune.

THE TRACK OF THE ECLIPSE.

I also send you the following in regard to the central track, or path of central or annualar eclipse. The time is given in mean time.

Local Time.			Lat. North.			Long. West.			Duration of annular eclipse.		Thickness of the portion of the sun's disc seen around the moon.
d	m	s	d	m	s	d	m	s	m	s	s
8	28	39	39	9	26	127	50	20			
8	45	35	40	6	10	124	51	22	1	59.94	11.98
9	1	21	41	4	31	122	9	52	1	59.18	11.68
9	17	15	41	58	43	119	41	18			

From the above statement it will be seen that the line of central eclipse first touches the western coast of California a little south of Cape Mendocino and passes across the State in a direction about 12° 4' north of east; passing a little to the south of Weaverville, which place is favorably situated for a fine observation. From the above data you may find, by simple interpolation, the latitude, longitude and time on the central track of any other point from which we wish to make observations, between the extremes given above.

In an annular eclipse the apparent diameter of the moon is less than that of the sun, and hence when the moon's center is in apparent contact with the sun's it does not hide his entire disc, but leaves a small portion visible around the outer edge of the moon, and hence the name *annular* (a ring.)

Wellington Coal.

The cheapest and most economical fuel for all purposes now in use in this market. One ton will last as long and give better satisfaction than two cords and a half of the best stove wood. For sale by all the retail coal yards in this city and county. For sale by the undersigned in car-load lots and over, delivered on the line of the S. P. R. R. Walter S. Maxwell, No. 10 Court street.

Electricity and Magnetism the New Means of Cure.

Dr. E. Robbins, the celebrated Australian Electro-Magnetic Healer, Larronde Block, corner First and Spring streets, entrance on First street, after several years' experience in the Australian colonies, San Francisco, Salt Lake City, Denver and two years in this city, has decided to permanently locate here, where he has performed so many wonderful cures without the aid of medicine. His rooms are crowded daily with patients anxious to get the benefit of his power over so-called incurable diseases. Dr. Robbins is patronized by many of our leading citizens. He also diagnoses diseases without explanation from the patients, free of charge, and has fitted up the Institute at considerable expense with Dr. Hoffman & Palmer's celebrated electro-therapeutic bath, which is pronounced by eminent physicians to be the greatest discovery in medical science of modern times; also other medicated baths, with the latest improvements in electrical instruments for administering Faradic, Galvanic and Static electricity.

NEIGHBORHOOD NEWS.

COMPTON.

A SEMI-OCCASIONAL NEWS BUDGET.

COMPTON, March 3.—We have never had a boom, but steady progress is the word in the face of hard times. Property is changing hands and improvement is being made on every hand.

Asbury McComas is erecting a livery stable here, 36x100 feet.

Mr. Lansing has sold an interest in his blacksmith shop to a Mr. Snodgrass, the same person who was reported as losing $300 while stopping at a hotel in Los Angeles lately. Fortunately it was *not* all he had, as reported, but all his wife happened to have in her purse.

Mr. A. P. Beutly has sold his entire interest in the lumber yard here to what will hereafter be known as the Compton Lumber Company, with Mr. F. Coffin as manager. Mr. C. has moved here with his family.

The Baptist denomination is taking steps toward erecting a place of worship here.

Public school opened on the 2d inst. with a full attendance.

The paper mill nuisance is becoming intolerable. The terrible stench from the waste water is still running through our village. On the 28th the citizens of this place held a meeting to discuss this matter and took the first step toward having the nuisance removed. There was a committee appointed to wait upon the proprietors and notify them to make provisions to relieve us.

Mr. Jotham Bixby is starting the largest dairy in the county, with Mr. John Cooke as manager. They expect to have everything in running order by the 1st of April. They start in with 200 milk cows. The object is to make butter and skim-milk cheese. Improved machinery for separating will be used, run by steam power. This creamery is located three miles east of here. They intend to add a larger number of milk cows soon.

Mr. B. H. Lathrop has been confined to his bed for some time, but is out again, looking rather thin. He is a veteran of the late war and is suffering from a gun-shot wound in the lung. Mr. L. also left a leg on the battlefield.

One day last week some children were playing in the willows on William Morton's farm where they started a fire, which rapidly spread in the dry grass, and several of the smaller children narrowly escaped being burned. Fortunately no damage was done except the burning of a small patch of two-year-old willows. The youngsters were badly frightened.

The surface of the ground is getting rather dry, but the fogs that visit us nightly are doing a great deal of good for the growing crops. We have not given up all hopes of a timely shower, although Potts is a failure this year.

G. A. M.

WILMINGTON.

PERSONAL, BUSINESS AND RELIGIOUS NOTES.

Correspondence of the TIMES.]

WILMINGTON, March 5.—Professor Bloomer, principal of the public school here, was summoned to Los Angeles yesterday morning by a telegram announcing the death of one of his twins. He has the sympathy of the community in his affliction.

Mrs. Dormer, who has been ill for some time, is not expected to live.

Mr. Wm. Glassford, for the past three years agent at the railroad station here, has gone to his ranch, above San Francisco, and his place here is filled by a Mr. Bailey.

Mrs. Wm. Owmans presented your correspondent with a hen's egg measuring 8x6⅛ inches, and containing enough for a good Lent breakfast. Who will beat that?

The new bridge being put in between here and Long Beach will not only supply a "long-felt want," but perceptibly increase the travel to our charming seaside resort.

The late mission at the Roman Catholic church in this place terminated in the confirmation of forty-seven children and adults.

The "Holiness Band" broke up about the same time without visible results.

SUB.

ALHAMBRA.

POMOLOGICAL AND PERSONAL NOTES.

Correspondence of the TIMES.]

ALHAMBRA, March 5.—H. W. Stanton has been appointed postmaster at Alhambra.

Two distinguished strangers arrived here last week. One is domiciled with the family of Mr. James Wayne, of Chicago, who have been spending some months in this vicinity, while the other has found a permanent home at the residence of A. C. Weeks.

The sad circumstances attending the sudden death of Mrs. Scoville, on Sunday morning, cast a gloom over the entire community. Funeral services were held at the house the next day, conducted by Rev. G. W. White.

Alhambra Lodge, I. O. G. T., has a large attendance, and meets regularly on Thursday evenings, at Stanton Hall.

H.

FLORENCE.

NEWS OF THE NEIGHBORHOOD.

Correspondence of the TIMES.]

FLORENCE, March 5.—People would gladly exchange some dust now and pay a good premium for mud. Out of the artesian belt crops are in very much need of rain, especially small grains. Damage from drouth in orchards can be much obviated by thorough cultivation.

Two families, seven in number, and relatives of Messrs. Ames and Boynton, one year since from Maine and lately from Minnesota, arrived at Florence recently to settle hereabouts. Also two nephews of the Ramsaur brothers, recently arrived from "Arkansaw" or thereabouts.

E. S. Waite takes the premium in the conspicuous oddity and yet economical structure of his new house. He is negotiating for jobs to build the same style of structures for other parties.

Mr. Ingles has been hauling gravel from near Charity hill, Los Angeles, to grade up his drive-way along to his house. He said that he was "bound to get good dirt if he had to haul it from Jerusalem."

Several loads of good sized orange trees passed through Florence recently, bound southward.

Several additional men are grafting at Ranney's nursery at present.

The new justice of the peace at Florence drew up his papers the other day in a manner known to the man who assisted him, for his first suit. The new constable, elected last November, failed to qualify and the old one holds over this term of office.

J. F. C.

ORANGE.

TWO SERIOUS ACCIDENTS.

Correspondence of the TIMES.]

ORANGE, March 12.—Mr. W. E. Sibley has sold twenty-nine acres of his rich, sandy loam land, near the depot, to a stranger who was looking for a good location.

Mr. Miner, a gentleman from Massachusetts, who bought a ranch across Santa Ana river, near the bridge, and is building a barn and neat, cosy residence, will look for his family from the East in a few days.

A lad about twelve years of age, son of Mr. Perry, while throwing a ball in the school-yard, heard his arm crack, and on attempting to raise the arm again found that it was broken. The fracture so strangely made is near the shoulder and a very serious one.

Mr. Henry Young, the Zanjero, was last Saturday thrown from a vicious horse which he had just mounted. He was very seriously, though not fatally, injured, and up to this date is still suffering severely and unable to leave his bed.

Various parties are trying their luck on shipping oranges to eastern markets.

A.

"Why do you set your cup of coffee on the chair, Mr. Jones," asked a landlady one morning at breakfast. "It is so weak I thought I would let it rest, ma'am," replied Jones.

FINANCE AND TRADE.

Stocks and Bonds.

By Telegraph to The Times.

NEW YORK, March 13.—Governments, quiet. Railway bonds active, irregular. To-day's stocks were the dullest for many weeks; not only was business extremely light, but the day passed without the development of any news having any material effect upon prices, and barring moderate fluctuations at the opening and again during the last half hour, the market was listless, and altogether as uninteresting as could be expected in midsummer.

Money, easy, 1@1½; closing, 1.

Prime paper, 4@5.

Exchange bills, dull, $4.83¼; demand, $4.86.

Petroleum, steady, 77¾.

Dr. Kellogg

—THE—

CELEBRATED & WORLD-RENOWNED

MAGNETIC HEALER,

From New York city, is now at the Pico House, and will remain there for a limited time, curing and healing the various complicated diseases to which the human frame is heir.

Dr. Kellogg has a world-wide reputation for his extraordinary cures of difficult and chronic cases.

He is the miracle of all mortal marvels, and one of the greatest wonders of the Nineteenth century, performing cures which equal, if not surpass, the old time miracles, causing the blind to see, the deaf to hear and the lame to walk.

CONSULTATION FREE, and one hour each day will be devoted expressly to the poor of this city, or those who are unable to procure their own medicine. They will be treated free of charge. The Doctor gives away more medicine than half the others sell. Consultations at office or by mail, free and invited. A friendly talk or opinion costs nothing. When inconvenient to visit the city for treatment, medicines sent by mail or express everywhere, securely packed, free from observation. Curable cases guaranteed; where doubt exists it is frankly stated. Hours 8 a. m. to 8 p. m. Sundays, 12 to 3.

Nervous Prostration, Debility, Mental and Physical Weakness, Mercurial and other Affections of Throat, Skin and Bones, Blood Impurities and Blood Poisoning, Skin Affections, Old Sores and Ulcers, Impediments to Marriage, Stunted Development, Rheumatism, Malaria. Especial attention to complicated, Difficult, severe and SURGICAL cases. Piles cured WITHOUT USING KNIFE.

Diseases from indiscretion, excess, exposure or indulgence, producing some of the following effects: Nervousness, Debility, Dimness of Sight, Perverted Vision, Defective Memory, Pimples on the Face, Aversion to Society of Females, Want of Pleasure in Life, Want of Ambition, Unfitness to Marry, Melancholy, Dyspepsia, Headache, Restlessness, Loss of Spirits, Pains in the Back, etc., are treated with unparalleled success, safely, privately.

Catarrh, Throat, Nose, Lung Diseases and ASTHMA. Liver Complaints.

It is self-evident that a physician paying particular attention to a class of cases attains great skill, and physicians in regular practice all over the country, knowing this, frequently recommend cases to this oldest office in America, where every known appliance is resorted to, and the proved good remedies of all ages and countries are used. A whole house is used for office purposes, and all are treated with skill in a respectful manner; and, knowing what to do, no experiments are made. On account of the great number of cases applying, the charges are kept low, often lower than is demanded by others. If you secure the skill and get a speedy and perfect life cure, that is the important matter. Leucorrhœa cured in four treatments. It is the most troublesome disease known to the female sex.

Cancer Cured without pain and speedily. No cutting done.

Tapeworm removed or no charge. Many persons suffer greatly from the effects of tapeworm who doctor for Dyspepsia, Indigestion, Nervous Prostration, Palpitation of the Heart and a Dry Cough, in consequence of the parasite irritating the throat.

THE SYMPTOMS OF TAPEWORM

Are characterized by restlessness at night, sickness of the stomach, vomiting, convulsions, epileptic fits, faintness, stupor, loss of memory, gnawing sensation in the stomach, pains in the side and back, dry cough, a voracious appetite at one time and a loathing of food at another, a choking sensation when lying down, disagreeable breath, face flushed, nose constricted, heaviness of the eyes, bad digestion, stomach bloated at times, emaciation of the body and great nervous debility and dizziness of the head. Some persons may have all the above symptoms while others only have a part of them, and some will have a tapeworm for a long time, and yet never pass any joints or pieces, which is the only positive evidence of its existence. During a residence of eight years in New York city he

Cured Over 6000 Patients.

A large portion of whom had previously been given over by ordinary practitioners as incurable. His system of treatment is peculiar to himself; by it the vital forces become equalized; no pain is caused; no poisonous medicine given, and no surgical operation performed. The most hopeless cases taken and cured after all else has failed.

CONSULTATION FREE.

Can take a tapeworm in two hours complete. Will prove to you, free of charge, as to whether you are afflicted with tapeworm or not. No charge for first lot of medicine.

Do not fail to visit Dr. Kellogg,

"The Wonder,"

After all others have failed to cure you. The most obstinate diseases succumb to the Doctor's unlimited skill.

My diploma hangs on my office wall for inspection of patients. Patients will find the Doctor a gentleman, socially as well as professionally.

OFFICE, PICO HOUSE.

Hours from 8 a. m. to 8 p. m. No business on Sunday. ja27 tf

MISCELLANEOUS.

Notice to Taxpayers.

OFFICE OF THE COUNTY ASSESSOR of Los Angeles county, No. 108 North Main street, up stairs, opposite Temple block, between Dillon & Kennedy and C. W. Gibson's cash store.

All persons, firms, companies, corporations and associations are required to deliver at the Assessor's office, Court House, immediately, a statement under oath of all the property, both real and personal, owned or claimed by him, her or them, or in their possession, or held in trust for others, at 12 o'clock meridian,

On the First Monday of March, 1885,

In accordance with the New Constitution.

Refusal or neglect to make a sworn statement of all the property owned or held in trust will subject the person so refusing or neglecting to make such sworn statement to the full penalty of the law—one hundred dollars fine and guilty of a misdemeanor.

All persons owning real estate that has heretofore been assessed in the wrong name on the Real Estate Assessment Roll, or who have purchased real estate within the last year, are requested to appear with their deeds at the Assessor's office and have the proper changes made for the year 1885.

Immediate attention is necessary, as work on the Roll has already been commenced.

Proper blanks may be obtained at the Assessor's office,

Two Dollars Poll Tax is now due and payable at this office or to any Deputy Assessor.

Two dollars Poll Tax will become delinquent on the First Monday in July Next, and your attention is called to Section 3852 of the Political Code.

3852. The receipt so delivered is the only evidence of payment.

And section 3860.

3860. If any person, assessed for a property tax, has not paid to the Assessor the poll tax due from him, or for which he is liable, it, with thirty-three and one-third per cent. in addition thereto, constitutes a lien upon the property assessed to such person, to attach from the first Monday in March in each year, and must be collected in the same manner and at the same time as delinquent taxes are collected. [In effect March 30, 1874.]

And all personal property tax must be paid immediately after the assessment is made.

I earnestly request of each and every taxpayer to file his statement

The Brown & Foster Hardware Company have changed their intention of occupying the quarters at the corner of Los Angeles and Requena streets, as announced in yesterday's TIMES, and have instead taken the store at 30 South Spring street.

Owing to the continued illness of Hamlet R. Brown, he has been compelled to make an assignment of his entire stock to Mr. E. F. Spence, the President of the First National Bank, who intends closing the same out at auction, commencing Thursday March 12, and continuing until sold. Sale every day and without limit.

The Los Angeles Electro-plating and Stencil Works, by the addition of new machinery are now prepared to re-plate worn-off tableware in the best possible manner at about one half the cost of new ware with the same amount of silver deposited on it. Also nickel and gold plating in all its branches. No. 239 South Spring street.

Senator A. P. Johnson, of San Bernardino and San Diego counties, accompanied by his wife, passed through yesterday, on his way home from Sacramento. He was a steadfast supporter of all measures that were for the benefit of Southern California, and is deeply disappointed on account of the failure of the Irrigation bills.

The lucky holders of these tickets are requested to call for their souvenirs. No. 1816, won parasol; No. 1693, sateen skirt; No. 1686, pink gingham dress; No. 1723, lace collar; No. 1837, blue gingham dress; No. 1682, half-dozen pairs of hose; No. 1611, elegant fan; No. 1667, corset; No. 1737, table cover; No. 1714, dozen linen collars. People's Store.

The Consulship at Lyons.

The M. Newmark from Los Angeles, mentioned in the dispatches as an applicant for the consulship at Lyons, is Myer J. Newmark, at present of San Francisco, but formerly a lawyer and afterward a member of the firm of H. Newmark & Co., of this city.

Mr. Newmark was for some time chairman of the Democratic County Committee here, and he was an active and able local politician. He is a man of brains and influence, and as the party in whose vineyard he has wrought is now in power again, after twenty-four years' waiting, and as Mr. Newmark would like to reside in Europe awhile, he thinks with the strong party backing he is able to muster here and in San Francisco, that he is as much entitled to enjoy some of the "baked meats" of office lying around loose as any of the Democratic brethren. He is not much acquainted with the French language, although his wife is French.

Mr. Newmark is now in Washington, pushing his own claims personally and through influential friends.

Latest Skating Novelty.

Bon-bon party with Chinese lantern illuminations at the Third Street Academy on Saturday evening next. Music. Grand march at 9.

THEIR LAST WEEK.

Silvas and Martinez Interviewed—Preparations for the Hanging.

The day which is to witness the law's sentence upon the murderers, Silvas and Martinez, draws on swiftly to the doomed men, and is so close as to reawaken public interest in the two unhappy men. All day yesterday there was a straggling procession of people anxious to get a glimpse of the gallows, if only by a peep through a crack. The finishing touches were being put to the instrument of death in the shape of paint upon the new portions. The gallows is that upon which McDowell was hanged at San Bernardino, and there is visible upon the cross-beam the groove made by the rope which closed his career. As both Silvas and Martinez will be launched into futurity side by side, by the same fall of the drop, it was, of course, necessary to enlarge the trap. For McDowell the aperture was 3x3 feet. It has now been cut to 3x4½ feet. The heavy door is fastened at the back by hinges, and in front rests its edge upon one oaken and two iron bolts, which are connected with the trigger at the extreme front of the platform. At each side of the door two grooves have been cut in the floor, so that in case one man should break his rope, or otherwise go awry, the other can be quietly swung to one side and the trap raised without trouble to drop again with the unfinished felon. The cross-beam is seven feet above the platform, and the drop from floor to the ground is a trifle over nine feet. When the Sheriff's toe presses upon the trigger, the trap falls like lightning, swings back by its own weight, catches on a snap and is held far out of the way. The platform is 8x8½ feet in dimensions; and is reached by a long, easy flight of stairs at the back. The situation of the gallows is on the southwest corner of the jail-yard, about equi-distant from the corner of the building, the south and west fences. It is in full view of School-house Hill, and is also commanded by the roofs of numerous blocks in the vicinity. It will, therefore, be impossible to give the execution any pretense of privacy, for 10,000 people could view it without entering the yard at all. There is no doubt that the men who are to expiate their crimes know of the erection of the gallows. The common inmates of the large upstairs cell can look out upon the ominous preparations, and their conversation is audible from the cells of the condemned.

A TIMES reporter yesterday inspected Mr. Cline's ghastly carpenter-work, under the escort of Mr. Cline himself—a veteran in such matters, and possessed of a real pride in the details of his unpleasant work—and then by the kindness of Jailor Thompson was allowed an interview with Silvas and Martinez. The two men are together in the safe-like cell on the upper floor, next that in which Jack Lenox is confined. Upon hearing their names spoken, both rose with clanking chains and stepped forward to the double-barred door. The heavy, dull, brutal countenance of Martinez displayed no emotion of any sort, and the few words he could be induced to utter were upon commonplaces. With his companion, however, it was very different. Silvas is 23 years old, a rather well-built and a well-featured man, of mild manners and a good deal of intelligence. His face is a handsome one of the better type of his countrymen, and bears the impress of anxiety and suffering. He spoke in a low, deprecating tone, sometimes forgetting his thoughts long enough to smile, but suddenly recalling himself, with an unspeakable sadness sweeping over his face. He speaks English readily, when he wishes, but did not desire to talk at the time. He said that his health was good, that he had kind treatment, and was as comfortable as could be expected. He cherishes hope that some interposition in his favor may be made in consequence of the petition mentioned in yesterday's TIMES. It is understood that there was no property consideration back of his marriage on Thursday to Juana Gamez—not Mariana Lastre, as reported. Silvas said, in answer to questions, that he had never known McIntire before the evening of the killing; and that he, Silvas, was drunk at the time and didn't know what he was doing. He is visited almost daily by Father Peter, who is preparing both the men for their swiftly approaching end. Martinez seems to have no sense of his awful situation; but Silvas's expressive face tells plainly of his mental burden.

That there is still a chance for Silvas may be seen by the following note from "Prophet Lewis:"

To the Editor of the Times—SIR: Though too full of fun, and what may be termed devilment by Salvationists and Holiness cranks to waste my life, for 0, I'm quite willing to be suspended instead of Silvas; *provided*, I'm the last to be subjected as a victim to a brutal and barbarous law, which even depraved worldly wisdom should see is no preventive of murder. Statistics prove that in countries where it is abolished murder is less frequent than elsewhere, upon the same principle that a debt of honor is the first liquidated.

Los Angeles City, March 13, 1885.

RECEPTION TO DR. GRAY.

Meeting in Honor of the Noted Botanist.

As has previously been noted by the TIMES, the Historical Society of Southern California has been planning to show due honors to Asa Gray, L. L. D., ever since the news of his intention to visit this city was first received. There is to be no effusive parading of courtesies—the good taste of the Society and the well-known modesty of Dr. Gray would alike forbid that—but merely a quiet social and instructive meeting with the man whom the world has long recognized as among its foremost in his department of science. Dr. Gray himself has never been a speaker; and a present severe cold, along with his advanced age, make it hardly probable that he will be able personally to address the gathering at any such length as a lecture would require. Fortunately, however, he can depute this matter to hands only less able than his own. In the special department of fungi and other cryptogamic plant-life, Prof. Farlow probably has no superior upon this continent; and he is also thoroughly at home in the whole range of botany. He has agreed to deliver, at the proposed meeting of the Historical Society, a lecture on "The Diseases of Plants, Caused by Fungi"—with especial reference to the grape, olive and orange. That such a lecture by such an authority will be of particular interest here, need not be said. The reception will take place at the Y. M. C. A. hall, Nadeau block, on Monday evening next. An evening of instruction and pleasure may confidently be expected.

THE TRINITY CHURCH ORGAN,

Its Dedication Last Night, With Appropriate Services.

The Trinity M. E. Church South has cause for pride in the new grand organ recently finished and last night appropriately dedicated by a recital. The organ, the largest and finest on the coast outside of San Francisco, was built for this church by George H. Kilgen, of St. Louis. It has 1126 pipes, twenty-five stops, two manuals and pedal compass of twenty-seven notes. It has also pneumatic action for operating couplers, two combination pedals for making forte and piano effects with the great organ, reversible pedal for operating the great to pedal coupler, and balanced swell pedal.

The registers are as follows:

Great Organ—Open Diapason, Melodia, Dulciana, Principal, Twelfth, Fifteenth, Mixture, Trumpet.

Swell Organ—Bourdon, Open Diapason, Stopped Diapason, Salicional, Flauto traverso, Violin, Flautina, Oboe, Bassoon.

Pedal Organ—Grand double open Diapason, Bourdon, Flute Bass.

Couplers, etc.—Swell to pedal, Great to pedal, Swell to great, Vox tremlant, Bellows signal.

The speaking front consists of thirty-five handsomely decorated pipes, which are mounted on a case of black walnut finished in gothic style and embellished with columns, capitals and rails carved to correspond with the interior decorations of the church.

An excellent programme was rendered at the dedication last night, by the following musical talent of this city: P. W. Hurndall, Mrs. C. S. Nellis, Mrs. B. W. Mattison, John L. Howes, Mrs. Fiske, Miss Mollie Hobbs, W. M. Foss, conductor.

Stuart Stanley.

On last evening, Stuart Stanley addressed the students of the State Normal School and visitors on the war in the Soudan. The whole subject was treated in a popular, graphic and interesting manner, to suit the capacities of a mixed audience, and some anecdotes of Arab life were recounted which told very favorably for those people. The whole affair passed off in the most agreeable way, and was wound up by an incident which caused a perfect roar of laughter.

After the lecture some questions were asked on various points, and among them one gentlemen asked, "Is it not true that England has her *hands* full just now?" Quick as lightning came back the reply from Stanley, "Yes! and her *pockets*, too!"

Tableau.

THE COURTS.

FRIDAY, March 13.

SUPERIOR COURT—*Judge Brunson.*

Gage Bros. vs. W. J. Woodworth: Summons ordered served on defendant by publication in Porcupine and copy mailed to defendant at Seattle, Washington Territory.

Gridley vs. Los Angeles County: Reset for March 20. Jury waived.

Abril vs. Bradbury: Reset for March 23, 2 p. m.

Lambie vs. Walters: By consent, default set aside. Five days additional for defendant to answer.

SUPERIOR COURT—*Judge Cheney.*

People vs. Juan Tapia: Plea, not guilty. Trial set for March 23d, 10 a. m. Remanded.

People vs. James D. Tighe: Continued to March 21st, 10 a. m. Bond $3,000. Remanded.

Attachment ordered to issue for John Boyd: Returnable March 16.

Inquest of insanity of Chas. Trainer: Drs. W. W. Ross, W. G. Cochran and F. T. Bicknell examiners. Trainer adjudged insane and committed to the asylum at Stockton.

CITY JUSTICE'S COURT—*Justice Austin.*

People vs. John Chinaman, misdemeanor: Found guilty and fined $5 or five days.

People vs. Wong Ark, assault to murder: Bail $1000, bond given. Examination to be taken up on motion.

People vs. Wm. Bates, disturbing the peace: Satisfaction acknowledged and defendant discharged.

People vs. Antonio Tapia and Alfredo Coover, battery: Tapia pleaded guilty; fine $10, paid. On motion of District Attorney, Coover was discharged.

AMUSEMENTS.

THE MINSTRELS.—The audience which "took in" the entertainment proffered by the Arlington, Girard & Wyatt Minstrels, last night, was of goodly proportions and plain appreciation. A new and very clever programme was presented, and in many points scored notable hits. The company is accumulating friends at each performance. The engagement ends with matinee and evening performance to-day.

New Books for the Library.

A correspondent writes to the TIMES as follows:

It is to be hoped that the new committee of citizens will see to it that new and desirable books are secured for the library within some reasonable time after they are obtainable.

Mrs. Helen Hunt Jackson's "Ramona" is meeting with great success, having already reached its seventh edition. Inasmuch as the scene of the story is laid here in Southern California, one would think that our Public Library ought to have a copy.

Why do not our booksellers here have the "Life of George Eliot" on sale? Why cannot our Public Library have a copy? Harpers publish it in three volumes for $3.75, also a sea-side edition for 45 cents.

These are suggestions worthy of the attention of the committees charged with the duty of supplying the Public Library with fresh books.

Praising a New Discovery.

The Mayor of Baltimore and every other leading municipal official have, in conjunction with the Governor of Maryland and other heads of the State Government, publicly indorsed by their autograph signatures the certificate of the Health Commissioner of Baltimore, setting forth the fact that the harmful and frequently fatal results attending the use of cough mixtures containing opiates, narcotics or poisons are entirely overcome in the Red Star Cough Cure. They state that it happily supplants the objectionable and dangerous features of preparations heretofore relied upon, and which have often caused the death of children.

And Still They Come.

Belle Brandon, one of the women of the town captured in last Sunday's raid, occupied the afternoon at Mayor Spence's court yesterday, having demanded a jury trial. She was sophistically defended by Ex-Justice Adams, while Mr. Graham appeared for the people. The charge of "vagrancy by reason of being a common prostitute" was amply sustained by the testimony of Officers Keary, Jackson and Davis, and the ingenious sophistries of the woman's counsel did not fool the jury, which returned a verdict of guilty after an absence of fifteen minutes. Belle will come up for sentence this morning. The case is to be appealed.

Sheet and Pillow-Slip Masquerade.

"The lady friends of the Eagle Corps" will give a sheet and pillow-slip masquerade at Armory Hall, March 27th, music being furnished by the Eagle Corps orchestra. These ladies are connoisseurs in the valuable science of having a good time in a good way, and whatever they turn their hands to is bound to be well done. They are no raw recruits in the matter of enjoyable entertainments, but veterans—using the word, of course, with reference to experience and expertness merely, and not to age. The present case will be only another in their list of victories.

Sudden Death.

F. M. Giamboni, aged about 50 years, has been joint partner with J. A. Starkey in the coffee house No. 123 Commercial street. Last night the police found him sick near the public fountain, and he was taken home by a friend. He died—probably of heart disease—before the arrival of a physician. An inquest will be held at 10 o'clock this morning at Albert Brown's by Coroner McFarland.

Died of His Injuries.

Coroner McFarland held an inquest yesterday on the body of Fong Ah Wah, who died in the morning of injuries received from a hand-car in Arizona. The jury, composed of B. F. Cotton, J. D. Williamson, James Way, W. M. Bostock, R. D. Veit and Charles Henry, found that Wah was 43 years old, and died of peritonitis, induced by the injuries above mentioned.

Change in Management.

Mr. O. W. Childs has taken the management of his two-hundred-lot tract into his own hands, and is pushing the sale forward rapidly. Parties desiring to invest in Los Angeles real estate should not let this opportunity pass, but call at No 1, Opera House block, and subscribe.

Benefit Ball.

It will be remembered that a fortnight ago the residence and jewelry store of Juan Castillon were damaged by fire and consequent flooding. The Union band gracefully steps forward to the relief of Señor Castillon, and proposes to give a benefit ball for him. It comes off at the Turnverein Hall on Sunday evening.

Grasping a Straw.

A petition, widely signed by Mexican citizens, has been sent to Governor Stoneman, asking the pardon of Refugio Silvas, who will swing next Friday, barring executive interference. There is very little likelihood that the petition will be granted.

Gave Themselves Up.

A stray horse and mule called at the Police Office last evening and gave themselves up to Officer Keary, who drove them to the pound amid countless jests.

Mass Meeting.

There will be an anti-Chinese mass meeting under the auspices of the Independent Labor Union No. 1, at the plaza this evening, commencing at 8 p. m.

Money

To loan at the office of the Southern California Insurance Company on first mortgage on real estate.

PERSONALS.

Coroner McFarland was up from Compton yesterday. Another Chinese case.

Mrs. J. G. Bowers and son left yesterday for a two months' visit East, taking in New Orleans on the way.

J. S. Cameron, an official of the C. B. & Q. B. R., returned to Chicago yesterday, after a pleasant visit in this vicinity.

Dr. O. W. Nixon, of the Chicago Inter-Ocean, left yesterday for the East. He is much benefited by his sojourn in California and may return.

Dr. J. Way, a prominent physician of Waynesburg, Pa., accompanied by his wife, is wintering in Southern California. They are at present stopping at the St. Charles.

Mr. Leo Leisee went north on the 12:20 train yesterday. It is understood that when he returns he will have taken unto himself a better-half—the daughter of Morris Sternberg, the merchant tailor of San Francisco.

A. C. Bird, General Freight Agent of the Chicago, Milwaukee and St. Paul railway, is spending some time in this vicinity as the guest of Mr. Brown of Compton. He is delighted with this country and will purchase a place before he leaves.

At the St. Charles are the following new-comers: Captain H. Herthern, ship Wet Campbell; W. H. Bull, Buffalo; J. M. Rodgers, Santa Monica; Alamo Harris, Ventura; A. C. Clarke, San Bernardino; Manuel Frates, Anaheim; Thomas H. Williams, Colton; Fred Zertz, H. H. Lanter, Pomona; Russ Pratt and wife, Miss Mary Odell, Tipton; Mrs. Geo. Compton, Newhall; Miss Compton, Toronto; Mr. and Mrs. W. H. Storey, Lancaster; Louis W. Beach, Savannah.

The St. Elmo reports the following arrivals: L. Block, J. Daychert, San Francisco; Mrs. B. Shaw, Colton; E. Williams and wife, Boston; D. Felsenheld, San Diego; A. F. Scholl, New York; J. J. Palm
